RED CROSS RADIO

Water-resistant, hand-cranked emergency AM/FM/SW radio charges cell phones, too! Always-ready AM/FM Shortwave Emergency Radio by Eton® ensures instant cell-phone power and light. Local and international radio stations on the AM/FM and eight shortwave bands. No batteries needed! Can be powered 4 different ways:

hand-powered generator, internal NiMH rechargeable battery pack, included AC adapter or 3 AA batteries (purchase separately). 90 seconds of cranking generates enough juice for about an hour of power. Recharge your cell phone simultaneously with one of the included adapters for Motorola, Nokia, Samsung, Sony/Ericsson and LG phones. (Not all manufacturers or makes are supported.) The ultra-bright multi-LED flashlight is ideal for every day and emergency use; a flashing red LED beacon and rescue siren let you signal for help. Includes a high-performance 2.5 inch speaker and an external headphone jack. A fine-tuning knob allows you to pinpoint a desired frequency; telescoping antenna provides enhanced FM and SW reception. Water-resistant housing measures 4 1/2" x 8 1/2" x 2". One year warranty.

DYNAMO SOLAR RADIO WITH LIGHT

The ideal emergency AM/FM unit offering both radio and flashlight in one. Precision electronic circuitry with high sensitivity reception, to create a compact emergency radio with superb, crystal clear sound. Set in a window or incandescent light and the solar panel will recharge the battery or wind the crank for 1-3 minutes to generate enough power for radio play. With a 3 volt AC/DC converter (not included) you can plug it in and play. (When the unit is running on DC, it charges the battery). The light is a flashlight/strobe combo, (with an amber, red and clear lens). Light bulb is replaceable. Radio takes "AA" batteries (not included).

VARIO WATER PURIFIER
Adjustable for different conditions. Combines two technologies...ceramic and pleated micro-filtration. Ultra fast flow (2 liters per minute). Replaceable carbon. Combines the benefits of easy operation, high water output and extended cartridge life. In dirty water conditions, a ceramic disc protects the primary filter. In normal water, it is easily adjustable to provide maximum water output. Attaches directly to water bottles or output hose to fill hydration systems or large containers. The cartridge capacity is up to 500 gallons (1875 liters), depending on water quality. Measures 6.5" and includes 2 bags of replaceable carbon pre-filter, deluxe carry bag and cleaning pad.

13-8729 79.95

FIRST AID KIT IN PLASTIC BOX

COPSS COMMUNITY OUTREACH PROMOTING SAFETY & SECURITY

"Promoting Emergency Preparedness through Proactive Community Outreach"

12 WAYS YOU CAN BE DISASTER PREPARED

- 1. AREA SURVEY** - Know about your area both at work and home. Are there Railroad lines, underground petroleum or chemical pipelines, refineries, natural gas or propane facilities, chemical plants or nuclear power plants in the area? Reservoirs, dams, rivers and costal areas may flood and maybe at risk for a tsunami. Some areas are prone to earthquakes, hurricanes or tornadoes.
- 2. THE FAMILY PLAN** - Decide where each member of the family should go in an emergency. Remember that roads and freeways may be jammed or flooded, power may be out; local phone service may be overloaded. Keep a pair of walking shoes and a survival backpack in your vehicle in case you have to leave it and travel on foot. Plan a safe route before a disaster occurs by vehicle and by foot.
- 3. OUT OF STATE CONTACT** - We have learned a lot over the years here in earthquake prone California, one of those lessons is that our phone system becomes overloaded with calls in an emergency. Although a local call may not go through, an out of state call may. If possible, have an out of state contact, a relative perhaps that all family members have a number for. They can act as a message center to help your family unite.
- 4. BUILD OR BUY A FAMILY DISASTER SUPPLY KIT** - It is a good idea to have a disaster supply kit for your family at home and individual family members at work, in the auto and at school.
- 5. STORE THE BASICS** - Every kit should include, water, food, basic survival and camping gear, including a good first aid kit, sanitation supplies, a source of light and heat for cooking and warmth. A water filter and or water purification tablets are good to have too.
- 6. SPECIAL NEEDS** - A spare set of eyeglasses, heart or other critical medications should not be forgotten, remember your pets, they are counting on you.
- 7. IF THE POWER FAILS** - Traffic lights, ATM machines, gas station pumps and cordless phones do not work. If you minimize opening and closing the refrigerator / freezer, the food will hold for a little while but a generator could be useful. Plan ahead; heavy-duty extension cords, gasoline, spare spark plugs and oil are necessary for generator operation.
- 8. ELIMINATE HAZARDS** - Secure loose items that can fall during an earthquake. Have a natural gas shut-off tool for home and work.
- 9. KNOWLEDGE** - Learn how to protect and aid your family, neighbors and co-workers. Take a basic and or advanced first aid course, learn CPR.
- 10. UNDERSTAND POST 9/11** - The world has changed. Know about possible terrorist target risks and what action and equipment is needed to correctly respond.
- 11. HAVE A PLAN** - Do not panic, if you plan ahead you will know what to do. A reasoned, rational response to the emergency will enable you to assist others.
- 12. PRACTICE** - Every 6 months conduct a family drill and make sure that everyone knows what to do, where to go and who to contact.
